

Cable / Router Notes

AFTER A POWER OUTAGE:

1. Power off the Cable unit and unplug the power to the Router. (black)
2. Power on the Cable unit and wait for at least 2 steady green lights.
3. Plug in the power to the Router. Power green and test light is yellow and then goes off. Another light indicating Internet is green.
4. Power on the computer(s). More lights show on the Cable / Router.

BEFORE A LIGHTNING STORM:

1. Power off the Cable and Router units.
2. Return to step 2 of **AFTER A POWER OUTAGE.**
