

DSL / Router Notes

AFTER A POWER OUTAGE:

1. Power off the DSL unit and unplug the power to the Router. (black)
2. Power on the DSL unit and wait for at least 2 steady green lights.
3. Plug in the power to the Router. Power green and test light is yellow and then goes off. Another light indicating Internet is green.
4. Power on the computer(s). More lights show on the DSL / Router.

BEFORE A LIGHTNING STORM:

1. Power off the DSL and Router units.
2. Return to step 2 of **AFTER A POWER OUTAGE.**
